Dear Mr. Gruenberg,

Please stop this attempt of tring to take over every corner of every possible inch of earth by Wal-Mart.

We don't need them to own and control every breath and dollar we have. It seems there is no rest until they have their grubby hands in and on everything.

Someone needs to give them, show them, some limits.

Sam may have started out with some good ideas but he is not around any longer and it seems that the ultimate goal is now to take over the world.

It gives me anti-Chriist chills.

We are still a Democratic society and in some places the effects of allowing such central powers would seriously be a blow to Our Founding Father's Dreams of and for this Great Land of Liberty and Freedoms of "In GOD We Trust"

I trust that you and all of your colleges will share the same values of and for the American people.

Sincerely  
DJ Beachy
